65 CM FUSELAGE

BLACKBIRD SURF 75

A very efficient foil for Surf, Wind-Wing and/or Windsurf. The generous surface area of the carbon front wing creates superb lift into to flight mode, even in lower speeds. A shorter fuselage creates great maneuverability and fluid performance in the surf. A shorter mast for lower, more controlled flight. Get going quickly and keep riding with the Blackbird Surf 75.

95 CM FUSELAGE

BLACKBIRD CRUZ 85

The Blackbird Cruz is an allround performer that brings joy in every discipline, this is the go-to-foil for maneuverable, smooth and super fun riding. A medium surface area of the carbon front wing provides a low drag for high top-end speeds whilst still generating superb lift.

The generous surface area of the carbon front wing creates superb lift into to flight mode, even in lower speeds. The 95 cm fuselage length provides additional stability and some extra power. The ideal foil to cover your windsurf foiling experience all the way from beginner to performance level.

Available with a Alu or Carbon mast.
